## 📁 Projects

### Json API Server

Key skills: flask, Docker ,python ,API design

In this project I created a JSON API server that can handle http requests from any external client to submit and retrieve data related to Teachers and the courses which they Teach in JSON format. The data is stored in a postgresql database .Complete system including database and flask server can be setup by using single command on a system,given that docker and bash scripts are supported .

### Hostel Room Management System: Web application

Key Skills: Python ,Django ,HTML, CSS,Software design

This project was aimed at making a hostel room management app for hostel administration and students of LNMIIT hostels It provides the facilities of managing the records of students residing in the hostel rooms, room change requests of students , and displays important stats related to hostels.
